Officer's narrative

Driver 1 was traveling northbound and entered the intersection on a green signal when Driver 2, southbound and turning left, failed to yield and struck the driver side of Driver 1's vehicle. Driver 1 reported pain in the lower back and difficulty turning the upper body immediately after impact. Passenger was seated in the front passenger position and was also present at the scene. Driver 2 stated that the collision occurred as Driver 1 described, and two independent witnesses gave consistent accounts of the signal phases and the point of impact. Scene photographs show intrusion damage to the driver side door and quarter panel, which is consistent with the force of a broadside collision. Responding officers observed no prior damage to either vehicle that would account for the injuries or the body damage. Passenger and both drivers were identified as occupants of the vehicles at the time of the crash. Driver 1 was identified as a resident of the policyholder's household and is listed as a covered household member. Medical transport was requested, and Driver 1 was transported to a local hospital for evaluation. Citaiton issued to Driver 2 for failure to yield.
