Officer's narrative

Driver 1 was traveling westbound on a multi-lane arteiral in Sugar Land, Texas, and was turning left into a commercial lot when the vehicle was struck on the driver side by Driver 2, who was proceeding straight through the intersection. Driver 1 was operating a vehicle in which the Passenger was also seated. Responding officers observed that the vehicle sustained front-end and driver-side damage that appears broadly consistent with the reported impact sequence. Photographs taken at the scene support several of the details provided by both drivers. No independent witnesses were located, and no statements could be obtained from anyone other than the parties involved. Both the officer and the parties at the scene cnofirmed that the Passenger was inside the vehicle at the time of the collision. Dirver 1 reported a wrist injury and was transported for evaluation, though it is not yet clear whether that injury resulted from this crash. Records reviewed at the scene showed no prior damage to the vehicle. Driver 1 is listed as a named insured on the policy covering the vehicle.
