May 2023: chiropractic adjustment, imaging, massage therapy	6	$1,987.63
June 2023: chiropractic adjustment, imaging, massage therapy, pain management, physical therapy	5	$2,014.24
July 2023: imaging, physical therapy	3	$1,831.07

Treatment summary

Patient prseented following a collision sustained while turning left, when the vehicle was struck from the side. The reported mechanism is consistent with the knee injury documented on initial evaluation, and the force involved appears compatible with the findings. Over the course of twenty visits, care followed a typical progression of physical therapy and medication management, with frequency of visits decreasing as symptoms improved and range of motion returned. Some examination findings, including swelling and pain with stress testing, support the diagnosis, while other tests such as ligament stability and neurovascular status were within nromal limits. No prior injury or treatment to the same area of the knee is known to this provider. Billing records include two similar charges posted on the same day, which are currently under review to confirm accuracy. Patient is being discharged from active care with a home exercise program and follow-up as needed.
