Officer's narrative

Driver 1 was stopped in the right lane of a city street in Pearland, Texas, when the vehicle directly behind, operated by Driver 2, struck the rear bumper at a speed the officer estimated as moderate. Driver 1 reported pain in the right shoulder and was transported for evaluation. The damage to both vehicles is consistent with the impact described by the drivers, and the rear panel of Driver 1's vehicle shows crush deformation that matches the point of contact. Photographs taken at the scene support several of the statements given, although no independent witnesses came forward to describe the collision. Officers confirmed through their own observation and statements from both drivers that a passenger was seated in the front right position at the time of impact. Inspection revealed no prior body damage or repair work on the struck vehicle that could be linked to this event. Driver 1 advised that they reside in the same household as the vehicle's named policyholder and share use of the car. Citations were not issued at the scene, and the report will be forwarded for supplemental review.
