Treatment History and Summary

Patient:	Jessica Thompson
Treating provider:	Monique Mejia, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
September 2023: chiropractic adjustment, evaluation, massage therapy, pain management, physical the	6	$1,788.14
October 2023: chiropractic adjustment, imaging	4	$2,764.79
November 2023: imaging, pain management, physical therapy	5	$3,116.66
December 2023: pain management, physical therapy	4	$1,524.50

Treatment summary

The patient presented following a rear-end motor vehicle collision with complaints of right shoulder pain and restricted range of motion. The reported mechanism of injury is consistent with the nature and force of the collision. Imaging and physical examination findings clearly confirm the shoulder injury, and the patient has no known prior injury to this body region. Care was delivered over nineteen visits and followed a typical course of conservative management, including manual therapy, graded therapeutic exercise, and home exercise instruction. Pain and functional limitations improved steadily, and visit frequency tapered as the patient progressed toward discharge. Billing records reflect single charges for each service rendered, with no duplicated or repeated billing observed. At discharge, the patient demonstrated near-normal shoulder mobility and strength, with residual symptoms that were mild and activity-limited. Continued home exercise was recommended, with follow-up as needed for any recurrence of symptoms.
