Officer's narrative

Driver 1 was stopped in the right lane of a city street in Houston, Texas, waiting for traffic ahead to clear, when the vehicle behind them, operated by Driver 2, struck the rear of Driver 1's car. Driver 2 told me the impact occurred because they did not stop in time, and this account matches what was described by two independent witnesses at the scene. Both witnesses saw the collision and stated that it happened as the drivers described it. Photographs taken at the scene show damage to the rear bumper and trunk of Driver 1's vehicle, and the location and pattern of that damage are consistent with a rear impact of this force. Officers found no sign of earlier damage to the vehicle. A Passenger was also in Driver 1's car, and both the responding officers and the witnesses confirmed that person was present during the crash. Driver 1 complained of neck pain and stiffness and said they felt whiplash symptoms within hours. Those complaints are consistent with the mechanics of this type of collision. Driver 1 is named on the insurance policy covering the vehicle.
