Officer's narrative

Driver 1 was traveling southbound on a multi-lane roadway in Katy, Texas, when the vehicle ahead slowed for traffic. Driver 1 reported that the vehicle stopped suddenly and was struck from behind by Driver 2's vehicle. Driver 2 acknowledged that they did not stop in time and admitted following too closely. Independent witnesses at the scene described the impact the same way, and photographs taken on scene are consistent with a rear-end collision. Passenger was seated in the rear of Driver 1's vehicle and was confirmed present by responding officers and witnesses. Driver 1 reported neck pain and stiffness consistent with whiplash and was transported to a local medical facility for evaluation. The injury complaint is plausible given the nature of the impact. Damage to the rear of Driver 1's vehicle is visible, but it is not clear from the scene whether all of the damage resulted from this impact. No prior damage to the vehicle is known to the reporting officer. Driver 1 is listed as a named driver on the policy covering the vehicle involved.
