Treating provider:	Zachary Johnson, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
May 2024: evaluation, pain management	2	$954.19
June 2024: chiropractic adjustment, pain management, physical therapy	4	$1,098.17
July 2024: chiropractic adjustment, massage therapy	3	$328.06

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of neck and low back pain and stiffness. Over nine visits, care consisted of physical therapy, guided home exercise, and short-term anti-inflammatory medication. The reported symptoms are consistent in nature and location with the mechanism and force of the impact. Early examinations documented reduced cervical and lumbar range of motion and paraspinal muscle tenderness, supporting the presenting complaints, while neurological screening and reflex testing remained within normal limits. No prior injury or treatment involving the same body regions is known to this office. The course of care followed a typical progression, with visit frequency decreasing as pain and mobility improved. Billing records reflect single, appropriate charges for each service rendered without duplication. At the most recent visit the patient reported substantial improvement and was discharged to self-directed exercise with instructions to return if symptoms recur.
