December 2024: chiropractic adjustment, massage therapy, pain management, physical therapy	4	$1,175.66
January 2025: massage therapy, pain management, physical therapy	5	$1,558.66
February 2025: imaging	1	$721.10

Treatment summary

Patient presented following a low-speed collision in a parking lot with pain and swelling over the distal radius of the left wrist. Imaging and examination findings clearly confirm a distal radius fracture. Over the course of 11 visits, the patient was managed with immobilization, progressive range-of-motion exercises, and scheduled follow-up imaging to monitor alignment and healing. Treatment followed a usual course and tapered as the patient improved, with pain and function steadily returning. The patient reports a remote strain in the same region years ago that resolved completely without lasting limitation. At this time it is not yet clear whether the present injury arose from this crash, and causation review is ongoing. Billnig records show no repeated charges for the same services. Discharge plan includes home exercise instructions and return precautions, with reassessment as needed.
