Officer's narrative

Officers responded to a report of a two-vehicle collision in a commercial parking lot in Pearland, Texas. On arrival, Driver 1 and Driver 2 were standing beside their vehicles, and both stated that the collision occurred as described when one vehicle backed out of a parking space and struck the side of the other. Several bystanders who saw the impact gave consistent accounts, and a witness ponited out the position of the vehicles before they were moved. Photographs taken at the scene show damage to the rear quarter panel of the vehicle driven by Driver 1, and the location and pattern of the damage match the impact described by all parties. No earlier damage to either vehicle was reported or observed. Passenger was seated in the front passenger seat of Driver 1's vehicle, and both the responding officers and the witnesses confirmed Passenger's presence at the time of the collision. Passenger reported pain in the wrist and was transported for evaluation. Officers note that it is not yet clear whether the wrist injury resulted from this collision. Driver 1 is listed as a named insured on the policy covering the vehicle, and the documents presented at the scene were reviewed.
