Treating provider:	Rachel Bell, DC
Diagnosis:	concussion

Treatment history by month

Month and services	Visits	Charges
May 2025: evaluation, pain management	3	$1,349.52
June 2025: massage therapy, physical therapy	5	$743.97
July 2025: chiropractic adjustment, massage therapy, pain management, physical therapy	4	$881.39

Treatment summary

Patient presented following a low-speed head-on collision with reported headache, dizziness, and difficulty concentrating. The mechanism and force of the crash are consistent with the injury described, and the symptom pattern fits a concussion. Over the course of twelve visits, care followed a typical progression, beginning with symptom monitoring, graded return to activity, and vestibular and cognitive support, and tapered as symptoms steadily resolved. Imaging and neurological examination findings clearly confirm the diagnosis. The patient reports a small strain to the same region several years ago, which healed completely without lasting limitation. Billing records reflect single, non-duplicated charges for each service rendered. Prognosis is good with continued gradual return to normal activities and follow-up as needed.
