November 2023: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$1,714.36
December 2023: chiropractic adjustment	1	$109.70

Treatment summary

Patient presented following a motor vehicle collision in whcih their vehicle was struck from the side while turning left. The reported mechanism and force are consistent with the cervical strain diagnosed at intake. Care was delivered over 41 visits, consisting of manual therapy, supervised therapeutic exercise, and home exercise instruction. The course followed a typical progression, with visit frequency tapering as symptoms and range of motion improved. Several examination findings, including limited cervical rotation and paraspinal muscle tenderness, support the diagnosis, while neurological screening and reflex testing were within normal limits. The patient reports a remote, minor strain to the same region in the past that resolved completely without lasting limitation. Billing records reflect single charges for each service rendered, with no duplicate entries.
