Officer's narrative

Driver 1 was stopped in the right-hand lane of the access road near Katy, Texas, when the rear of the vehicle was struck by a sedan operated by Driver 2. Driver 1 reported pain in the left knee at the scene and was transported for evaluation. The knee complaint is conisstent with the mechanism of a rear impact in which the lower body braces against the footwell, and the damage to the rear bumper, trunk lid and tail lamp assembly matches the impact described by both drivers. Responding officres saw no earlier damage to either vehicle that would suggest a prior loss. The Passenger, seated in the front right seat, was present in the vehicle at the time of impact, and this was confirmed by officers on scene and by statements from both drivers. Scene photographs document several of the reported conditions, although no independent witnesses came forward and no one else observed the collision. Driver 1 is listed as a named insured on the policy covering the vehicle involved.
