Claim Notes

Claim number:	C-1162
Claimant:	William Lyons
Adjuster:	Jerry Hanson

06/13/2023
First notice of loss received by phone from the claimant, who reports a low-speed head-on collision at a residential intersection earlier today. The claimant states they were the driver of the insured vehicle and complains of neck pain.

06/30/2023
Recorded a detailed statement from the claimant, who described the sequence of events and the approach of the other vehicle in the same way as in the first call. Confirmed the claimant was seated in the driver's seat at the time of impact.

08/18/2023
Spoke with the other driver, who independently confirmed the vehicles collided head-on at low speed and that the claimant was behind the wheel. Their account matches the claimant's description of the collision.

09/23/2023
Reviewed the police report, which lists the claimant as a vehicle occupant and records the same location, time of impact, and direction of travel. Report notes no citations were issued.

10/25/2023
Obtained scene photographs and two witness statements. Both witnesses describe a minor impact consistent with what the claimant and the other driver reported.

11/05/2023
Insepcted the insured vehicle. Front-end dmaage is consistent with the reported impact. A few old scratches on the lower bumper may predate this loss and have been noted separately for the repair estimate.

11/22/2023
Confirmed with the policy records that coverage was in force on the date of loss and that no prior claims or damage reports exist for this vehicle. Nothing in the file suggests damage occurred before coverage began.

12/08/2023
Verified that the claimant is a household member of the policyholder and lives at the same address, so they qualify as a covered driver under the policy.

12/14/2023
Claimant has reported neck stiffness and headaches to the treating provider. The provider's notes indicate a whiplash-type injury, which is a plausible result of a collision of this kind. No prior treatment to the neck or upper back appears in the records available.

12/28/2023
Treatment has followed a typical course of physical therapy and medication. Claimant reports steady improvement, and the frequency of visits has decreased as recovery progressed.

01/05/2024
Called the claimant for a status update. Claimant repeated the same account of the accident and the symptoms, with no changes to the timeline or the injuries described earlier.

01/11/2024
Reviewed the file as of today. Liability and coverage are confirmed, the injury appears consistent with the collision,

and treatment is tapering as expected. Recommended proceeding with the standard evaluation of the bodily injury claim.

Recorded Statement

Claim number:	C-1162
Statement of:	William Lyons
Taken by:	Jerry Hanson
Date:	06/08/2023

Q: This is the adjuster calling about the auto claim you reported. Is it all right to record this statement?

A: Yes, that's fine.

Q: Please state your full name for the record.

A: I'd rather just give my first name for now, if that's okay.

Q: That's acceptable. Can you walk me through what happened on the day of the collision?

A: I was driving thruogh Pasadena, Texas, heading toward a shopping center. Traffic was slow. A vehicle coming the other way drifted into my lane and we ended up nose to nose. It wasn't a hard hit, more of a bump, but both frnot ends were involved.

Q: What speed were you traveling when the vehicles made contact?

A: I'd guess maybe fifteen or twenty miles an hour. I had already slowed down because of the traffic ahead.

Q: Did either airbag deploy?

A: No, they didn't. My car didn't go into any kind of crash mode.

Q: Did you get out of the vehicle at the scene, and were you able to drive it away?

A: I got out and checked on the other driver. The car was drivable, but I had it towed because the front bumper was pushed in and the hood wouldn't close right.

Q: How are you feeling physically since the collision?

A: My neck is stiff and sore, and it hurts when I turn my head to check my blind spot. Over the last few days I've also had hedaaches that start at the base of my skull.

Q: Have you seen a medical provider about these symptoms?

A: Yes, I went to an urgent care clinic the next morning. They diagnosed wihplash and gave me a referral for physical therapy.

Q: Is there anything else you'd like to add before we finish?

A: Only that I want to make sure the repair estimate reflects the damage to the front end, because it still doesn't feel right when I brake.

Q: Thank you. I'll follow up with you about the next steps.

A: Thanks, I appreciate it.
