Officer's narrative

Officer's narrative: On the afternoon of the reported collision, I responded to a two-vehicle rear-end crash in Pasadena, Texas. Driver 1 was stopped in the travel lane when the front of Driver 2's vehicle struck the rear of Driver 1's vehicle at low to moderate speed. Passenger was seated in the front passenger position of Driver 1's vehicle and was present at the scene, and both drivers and a responding unit confirmed this. Passenger reported neck pain and stiffness immediately after the impact, which is consistent with the forces expected in a collision of this type. Damage to the rear of Driver 1's vehicle and the front of Driver 2's vehicle lines up with the described impact, and no earlier damage to either vehicle was known to the parties or visible on inspection. Scene photographs confirm the positions of the vehicles and the damage areas. No independent witnesses were located. Driver 2 stated that he lives in the same household as the policyholder, Driver 1, and is listed as a member of that household for coverage purposes.
