Patient:	Kyle Hahn
Treating provider:	Laura Bennett, DC
Diagnosis:	concussion

Treatment history by month

Month and services	Visits	Charges
May 2025: evaluation, physical therapy	2	$564.64
June 2025: chiropractic adjustment, imaging, physical therapy	5	$1,347.73
July 2025: chiropractic adjustment, pain management, physical therapy	4	$957.83
August 2025: imaging	1	$684.10

Treatment summary

Patient presented following a rear-end motor vehicle collision with reported head impact and subsequent concussive symptoms incluidng headache, dizziness, light sensitivity, and difficulty concentrating. The mechanism and force of the collision are consistent with the injury described. Over the course of twelve visits, care proceeded along a typical clinical pathway, combining symptom monitoring, vestibular and cognitive assessment, graedd activity guidance, and education on symptom management. Neurological examination and imaging findings clearly support the diagnosis of concussion. There is no known prior injury or treatment involving the same region. Frequency of visits decreased steadily as symptoms resolved, and the patient was discharged to full activity with instructions to return if new or worsening symptoms develop. Billing records reflect single, appropriate charges for each service rendered without duplication.
