Officer's narrative

Driver 1 was stopped at a red signal in the right lane of a Baytown, Texas arterial when a vehicle operated by Driver 2 struck the rear of Driver 1's vehicle. Driver 1 is the named insured on the policy under which this claim is presented. Driver 1 reported neck strain at the scene and was evaluated by responding medical personnel. The reported injury is consistent with the type and force of a rear impact of this nature. Scene photographs taken by the investigating officer confirm the general location of the vehicles and the area of impact, and the damage to the rear of Driver 1's vehicle is largely consistent with the described collision. No prior damage to the vehicle was known to the officer or reported by either party. No independent witnesses came forward, and the accounts given by Driver 1 and Driver 2 were recorded separately. Driver 1 stated they were seated in the driver's position, though a Passenger present in the vehicle gave a seating account that differed slightly, and the exact seating arrangement at impact could not be fully established from the evidence available.
