Bodily Injury Unit

Claim Notes

Claim number:	C-1180
Claimant:	James Smith
Adjuster:	Christopher Wong

1-3-25
First notice of loss received for a rear-end collision at a low-speed intersection. The insured's vehicle was struck from behind while stopped, and the claimant reports a knee injury. The claimant is represented by counsel, so all further contact will go through the attorney's office.

1-29-25
Confirmed that the driver of the vehicle involved is named on the policy and that coverage was in force on the date of loss. Opened bodily injury and property damage feature files.

3-25-25
Spoke with the other driver, who confirmed the accident happened as the claimant described it. The other driver's account matches the claimant's in every detail that was discussed.

4-8-25
Police report obtained. It lists the claimant as a passenger in the vehicle at the time of impact, consistent with statements from both the claimant and witnesses.

4-25-25
Reviewed scene photographs and a statement from an independent witness. Both support the account of how the collision occurred. Vehicle damage appears largely consistent with the described impact.

4-28-25
Obtained the vehicle's prior repair history. No earlier damgae to the vehicle is on record, and nothing in the file suggests the damage predates the start of coverage.

5-10-25
Claimant's attorney submitted the initial medical records. The reported knee injury is a plausible result of a collision of this type.

5-15-25
Reviewed the claimant's medical history with the attorney's office. No prior injury to the same body area is known, and the claimant has told the same account of the accident in every conversation so far.

5-26-25
Treatment began with a standard course of physical therapy and imaging. Records show the care followed a typical progression for this type of injury.

5-31-25
Medical updates indicate steady improvement. Therapy visits have been reducing in frequency as the claimant's condition gets better.

6-18-25
Received follow-up records showing treatment has tapered off as expected. The claimant has not reported any new symptoms or additional providers.

6-30-25
Reviewed the full file with the supervisor. The claim appears consistent throughout, and the injury and damage align with the reported accident. Next step is to finalize the medical evaluation with the attorney's office.

Recorded Statement

Claim number:	C-1180
Statement of:	James Smith
Taken by:	Christopher Wong
Date:	12-20-24

Q: Thank you for agreeing to give this recorded statement. Can you confirm you understand it is being recorded?

A: Yes, I understand.

Q: Where were you sitting when the collision happened?

A: I was in the front passenger seat of my friend's sedan. We were stopped at a light on the main road in Pearland.

Q: What happened next?

A: The car behind us didn't stop in time. I felt a hard jolt from behind, and our car was pushed forward into the vehicle in front of us.

Q: Did you see the other vehicle before the impact?

A: Only in the side mirror for a second. It looked like it was moving too fast for the traffic that was stopped.

Q: Did you hit anything with your body inside the car?

A: My right knee struck the dashboard. It was a sharp pain right away, and it swelled up over the next hour.

Q: Did you get medical attention?

A: Yes, I was taken to an urgent care clinic that evening. They took X-rays and told me to keep weight off it and use a brace.

Q: Are you still having symptoms?

A: Yes. Stairs are difficult, and my knee locks sometimes. I have an appointment with an orthopedic specialist next week.

Q: Did you have any knee problems before this collision?

A: No, not that I can recall. I played recreational softball, and I had no problems with that knee before.

Q: Is there anything else you would like to add?

A: Only that my friend was also hurt, and we both want this handled fairly. I can send you the clinic records whenever you need them.

Q: Thank you. This concludes the statement.
