Officer's narrative

Driver 1 was traveling in the left lane on a multi-lane roadway in League City, Texas, when the vehicle attempted to change lanes to the right. Driver 2 was operating a vheicle in the rihgt lane, and the two vehicles made contact along their adjacent sides during the lane change. Officers arrived and observed that the damage to both vehicles was consistent with the reported sideswipe, with scrape marks and displaced trim running along the right rear quarter panel of Driver 1's vehicle and matching contact on Driver 2's left side. No earlier damage to Driver 1's vehicle was known to officers or noted during the inspection. Driver 1 was identified as the named insured on the policy for the vehicle. Driver 1 reported neck strain and stated that the impact jolted their head and upper body forward and back. A Passenger was also in Driver 1's vehicle at the time of the collision, and both responding officers and a second party on scene confirmed that presence. Photographs taken at the scene confirm several of the reoprted details, although no independent witnesses to the collision were located. The reported injury appeared to match the direction and force of the impact as observed at the scene.
