Description of the accident (claimant's words)

I was riding in the front passenger seat when our car was struck from behind while we were stopped at a red light in Pasadena, Texas. The impact pushed me forward and then back against the seat, and I felt a sharp pain in my neck and upper back almost immediately. I was taken to a clinic that afternoon, where I was told I had whiplash. I have described what happened the same way each time I have spoken about it, whether to the officer at the scene, the medical staff, or the adjuster who called me. The driver of the car I was riding in is the person named on the policy, and she puleld over right away and exchanged information with the other driver. Since the collision I have had stiffness, headaches, and trouble turning my head to check mirrors, and I have been following the physical therapy plan my doctor recommended.
