Officer's narrative

Officer narrative. On arrival at the scene in Pasadena, Texas, I observed a rear-end collision involving two vehicles. Driver 1 was operating the lead vehicle and stated that Driver 2 struck the rear bumper while Driver 1 was stopped in traffic. Driver 2 agreed that the impact occurred but gave a different account of the lane positions. Passenger later reported neck pain and symptoms consistent with whiplash, which is a plausible injury for a collision of this force. The rear damage to the lead vehicle matches the impact described by both drivers, and I found no sign of earlier damage to either vehicle. Scene photographs confirm the position of the vehicles and the damage pattern. No independent witnesses were located. Two bystanders who spoke with me and Driver 1 both stated that Passenger was not inside the lead vehicle when the collision happened. Driver 1 is listed as the named insured on the policy for that vehicle. Statements have been recorded and the file is pending supplemental review.
