Claim Notes

Claim number:	C-1211
Claimant:	Kevin Stanley
Adjuster:	Christopher Wong

11-26-24
Claim reported by the policyholder's driver after a low-speed collision in a parking lot. The driver is named on the policy, and the police report confirms the clamiant was in the vehicle at the scene.

12-7-24
Claimant reports a wrist fracture and says the impact came from the driver's side while the car was reversing. Claimant states two passengers were in the car at the time.

1-17-25
Photos of the vehicle were received. They show damage consistent with a collision, but no independent witnesses have come forward and the scene is not otherwise documented.

1-23-25
Medical records show a wrist fracture consistent with the kind and force of a collision of this type. The claimant also disclsoed a minor strain to the same area several years ago, which healed fully.

3-30-25
Claimant gave a second statement. The direction of impact is now described as coming from the front, and the claimant now says one passenger was in the car, not two. No prior damage to the vehicle is known, and nothing suggests the damage predates the policy start date.

4-2-25
Inspection notes the dents sit on the passenger side and at a higher point on the body than the impact the claimant describes. This does not match the account given so far, and the discrepancy is being reviewed with the appraiser.

4-17-25
Treatment followed a usual course and tapered as the claimant improved. The file is being held pending the reconciliation of the statements and the inspection findings.

Recorded Statement

Claim number:	C-1211
Statement of:	Kevin Stanley
Taken by:	Christopher Wong
Date:	8-30-24

Q: Thank you for taking the time to speak with me today. This recorded statement concerns the parking lot collision you reported in Houston, Texas. Please sttae your full name for the record.

A: Sorry, I'm not comfortable giving my full name on a recording just yet. You can refer to me as the driver of the silver sedan.

Q: That's fine for now. Can you describe what happened when you were leaving the parking spot?

A: I had just backed out slowly, checking my mirrors like always. A pickup came down the aisle fasetr than I expected and clipped the rear quarter panel of my car. I braked hard, and the jolt threw me against the steering wheel and then the door frame.

Q: Did you have any part of your body injured in the collision?

A: Yes. I put my left arm out to brace myself, and my wrist hit the console. The doctor at the urgent care clinic said it's a fracture. They put me in a splint and told me I'll need to see a specialist.

Q: Do you know which way the pickup was traveling, and was it moving before you started to back out?

A: It was coming from the far end of the row, moving toward the exit. I didn't see it until it was already close. I can't say for certain how fast it was going.

Q: Did anyone witness the collision, or did you take any photographs of the scene?

A: A man in the next row got out of his car to look, but I didn't get his contact details. I took a few photos of both vehicles before I left the lot.

Q: Have you received any medical treatment beyond the urgent care visit?

A: Not yet. I have a follow-up appointment scheduled with an orthopedic specialist, and I'm waiting on the imaging results.

Q: Thank you. Is there anything you would like to add to your statement?

A: Only that I want my car repaired properly and my medical bills taken care of. I've been without my usual transportation for a while now, and it's been stressful.

Q: Understood. This concludes the recorded statement. Thank you.

A: Thank you.
