Treatment History and Summary

Patient:	Howard Davenport
Treating provider:	Melanie Gomez, DC
Diagnosis:	knee injury

Treatment history by month

Month and services	Visits	Charges
February 2025: chiropractic adjustment, evaluation	4	$630.50
March 2025: chiropractic adjustment, massage therapy	3	$291.68
April 2025: pain management, physical therapy	4	$1,740.66

Treatment summary

Patient presented following a sideswipe collsiion during a lane change, reporting pain and swelling in the right knee. Over the course of eleven visits, the patient received conservative management including physical therapy, activity modification, and anti-inflammatory medication. The mechanism of injury described is consistent with the knee trauma observed on examination. Imaging and clinical findings clearly confirm the injury. The patient reports no prior problems involving this knee, and no earlier injury to the area is known to this office. Recovery has been slower than typically expected for this type of injury, so the course of care was extended somewhat beyond the usual timeline. Billing records reflect single, non-duplicated charges for each service rendered. Current status shows gradual improvement, with a plan for reassessment and a home exercise program.
