Officer's narrative

Driver 1 was traveling northbound in the left lane approaching the signalized intersection in Sugar Land, Texas, when the vehicle was struck on the driver's side by Driver 2, whose vehicle was southbound and entered the intersection as the light changed. The point of impact on both vehicles is consistent with a right-angle collision of this type. Driver 1 reported pain in the right shoulder at the scene and was evaluated by responding medics, whose observations align with the force of a side impact of this kind. Passenger was seated in the vehicle at the time of the collision and was also present for the statements taken at the scene. Driver 1 stated that no prior damage had occurred to the vehicle. Scene photographs taken by the officer show damage to the driver's side panels and door, which matches the account given by both drivers. No independent witnesses were located at the intersection, and no traffic camera footage was available at the time of this report. Driver 1 provided a copy of the insurance policy, under which Driver 1 is the named insured. Both drivers were cited for further review, and the matter has been referred for follow-up.
