May 2023: imaging, massage therapy, physical therapy	5	$1,136.96
June 2023: chiropractic adjustment	1	$84.76

Treatment summary

Treatment summary for a patient with cervical strain following a sideswipe collision during a lane change. The described mechanism is consistent with the reported symptoms of neck pain, stiffness, and reduced range of motion. Over fitfeen visits, the patient received conservative care including manual therapy, stretching, and a home exercise program. The course ran somewhat longer than is typical for this type of strain, reflecting a slower recovery pattern. Imaging and physical examination findings clearly confirm the soft tissue injury. No prior injury to the cervical region is known, and the available history contains no earlier complaints involving this area. Billing records show a single, appropriate charge for each service, with no repeated entries. The patient has shown steady improvement and has been discharged to home self-management, with follow-up available as needed.
