Officer's narrative

Driver 1 was travleing in the left lane of a multi-lane roadway in Baytown, Texas, when Driver 2 changed lanes from the right and moved into the space Driver 1 occupied. The vehicles made contact along their sides, and the impact scraped the rear quarter panel of Driver 1's vehicle and crushed the front passenger door, whcih is consistent with the sideways force described by both drivers. A Passenger was seated in Driver 1's vehicle at the time and was also present on arrival of officers. Driver 1 reported a knee injury, which is a plausible result of the knee striking the lower dash or door trim during a collision of this type. Officers reviewed the scene, spoke with independent witnesses, and examined photographs taken at the location. Each source gave an account matching the sequence of events, and Driver 2 acknowledged the lane change. Officers found no indication of prior damage to Driver 1's vehicle. Driver 1 is listed as the named insured on the policy covering the vehicle.
