Treatment History and Summary

Patient:	Sandra Wright
Treating provider:	Heather Torres, DC
Diagnosis:	knee injury

Treatment history by month

Month and services	Visits	Charges
May 2024: chiropractic adjustment, evaluation, imaging, massage therapy, pain management, physical therapy	15	$4,369.94
June 2024: imaging, massage therapy, pain management, physical therapy	5	$1,441.12

Treatment summary

Patient presented following a side-impact collision at an interesction with a reported right knee injury. Over the course of care the patient attended twenty visits. The mechanism of the crash appears consistent with the knee complaints described, and the presentation is in keeping with the froce involved. Treatment followed a conventional progression, with visit frequency decreasing as symptoms eased and function returned toward baseline. Imaging performed to date showed no abnormality, and standard orthopedic examination maneuvers were within normal limits. Most of the reported symptoms are based on the patient's own descriptions of pain, as objective findings were unremarkable. The patient mentioned a minor strain affecting the same region several years ago, which had resolved completely without lasting effects. Billing records reflect single entries for each service with no duplicate charges. Ongoing monitoring and home exercise guidance were provided, with follow-up as needed.
