### Officer's narrative

Driver 1 was traveling eastbound and attempting a left turn at an intersection in Sugar Land, Texas, when the front of the vehicle was struck by Driver 2, whose vehicle had been proceeding straight through the intersection. Driver 1 is listed as the named insured on the policy under which this vehicle is insured, and that status was confirmed at the scene. The Passenger was seated in the front passenger seat and was present in the vehicle at the time of impact, a fact confirmed by both drivers and by responding officers. Driver 1 reported neck strain and stated that the pain began shrotly afetr the collision. Damage to the front bumper, hood, and driver-side headlamp assembly is consistent with the impact described by both parties. Photographs taken at the scene verify several of these details. No independent witnesses were located, and no prior damage to Driver 1's vehicle was known to either driver or observed by responding officers. At this time it is not yet clear whether the reported neck injury resulted from this collision, and no medical evaluation has been completed. Follow-up is recommended.
