Officer's narrative

Driver 1 was traveling in the left-hand lane on a Pearland, Texas roadway when the vehicle moved over to the right lane without a visible signal, contacting the side of Driver 2's vehicle as it passed. Driver 1 reported pain in the right shoulder following the impact and was assessed at the scene. The reported injury is consistent with the type and force of a sideswipe collision of this kind. Both vehicles displayed scrape marks and paint transfer along the right side of Driver 1's vehicle and the left rear quarter panel of Driver 2's vehicle, and the damage pattern matches the impact described by both drivers. Photographs taken at the scene confirm the general positions of the vehicles and the damage observed. No independent witnesses were located who saw the collision itself. Officers confirmed that the Passenger was seated in the vehicle at the time of the crash, a fact also confirmed by Driver 2. No prior damage to Driver 1's vehicle was known to either party or noted during the inspection. Driver 1 is listed as an insured driver on the policy covering the vehicle.
