Claim Notes

Claim number:	C-1245
Claimant:	Lisa Patterson
Adjuster:	Christopher Wong

1-14-25
Claim opened after a low-speed head-on collision repotred by the insured's driver, who is named on the policy. The claimant is represented by counsel, and all further contact will be routed through the attorney's office.

3-1-25
Police report and two independent witnesses confirm the claimant was seated in the vehicle at the time of impact. The other driver gave a statement that matches the sequence described at first notice.

3-2-25
Photographs of both vehicles were reviewed. The damage pattern is consistent with the reported impact, and the front-end deformation lines up across both cars.

4-7-25
Vehicle inspection completed. No prior damage to the affected areas is known from the claim file or the vehicle history, and nothing sugegsts any of the damage predates the policy's coverage start.

4-27-25
Claimant reported neck pain and stiffness at the first medical visit. The reported injury is a common result of the kind and force of this type of collision.

5-5-25
Medical records received. Treatment followed a usual course, with physical therapy and a short run of medication, and the claimant's symptoms eased steadily as they improved.

5-18-25
Attorney's office confirmed the claimant's account. The claimant has given the same description of events in every conversation so far, including the initial call, the recorded statement, and the follow-up interview.

7-19-25
Reviewed prior medical history with the claimant's authorization. No earlier injury to the neck or upper back is documented, and no prior claims involving the same body area appear in the index search.

7-31-25
Treating provider's notes show progressive improvement with reduced visit frequency over the following weeks. The treatment timeline is in line with a typical soft-tissue recovery.

8-19-25
Witness statements, photographs, and the other driver's account all confirm the collision occurred as described. No conflicting information has been found in the file.

8-21-25
Claim reviewed against all available documentation. The injury, treatment course, vehicle damage, and account of events are consistent with one another, and the file is ready for settlement evaluation with counsel.

Recorded Statement

Claim number:	C-1245
Statement of:	Lisa Patterson
Taken by:	Christopher Wong
Date:	1-8-25

Q: Thank you for taking the time to give this recorded statement. Please state your full name for the record.

A: I'd rather just be referred to as the claimant for this, if that's okay.

Q: That's fine. Can you tell me where the collision happened?

A: It was on a two-lane road in League City, Texas, near a shopping center entrance.

Q: What were you doing right before it happened?

A: I was driving home from the grocery store. It was a clear afternoon and traffic was light.

Q: Which direction were you traveling, and what was the other vehicle doing?

A: I was heading north. The other car was coming south and it drifted into my lane. We ended up nose to nose, but we weren't going very fast. Maybe fifteen miles an hour at most, I'd guess.

Q: Did you or the other driver brake or swerve?

A: I braked hard and turned the wheel to the right, but there wasn't enough room. The impact was more of a jolt than a crash.

Q: Were there any airbags deployed in your vehicle?

A: No, they didn't go off. My car was still drivable, so I pulled onto the shoulder.

Q: Did you feel any injuries at the scene?

A: Not right away. I felt stiff in my neck that evening, and by the next morning it was sore and I had trouble turning my head to check my blind spot.

Q: Have you seen a medical provider since the collision?

A: Yes, I went to urgent care two days later. They diagnosed a neck strain and gave me muscle relaxers and a referral for physical therapy.

Q: Is there anything else you'd like to add to your statement?

A: Only that I'm still having stiffness when I drive and when I sleep. I'm working with my doctor on it.

Q: Thank you. This concludes the recorded statement.
