Officer's narrative

Driver 1 was stopped in the right lane of the northbound frontage road near Pearland when the rear of the vehicle was struck by Driver 2, whose vehicle was traveling at a speed the officer estimated as moderate for the conditions. Driver 1 reported pain in the rihgt shoulder and said the impact pushed the vehicle forward with considerable force. The officer observed rear crush damage consistent with the described impact, and the overall pattern of damage to the bumper, trunk and taillight assembly matched what the drivers described. Photographs taken at the scene confirm the general position of both vehicles and the visible damage, though no independent witness was located who saw the collision occur. Driver 2 stated that the brakes were applied late due to distraction. A Passenger was present in the front seat of Driver 1's vehicle, but Driver 1 was not entirely certain of the seating position at the moment of impact and the passenger's account was brief. Driver 1 reported no prior damage to the vehicle, and the officer found no evidence of earlier repairs. Driver 1 is listed as the named insured on the policy covering the vehicle involved.
