Treatment History and Summary

Patient:	Brittany Jackson
Treating provider:	Heather Torres, DC
Diagnosis:	concussion

Treatment history by month

Month and services	Visits	Charges
June 2023: evaluation, pain management	2	$860.55
July 2023: chiropractic adjustment, physical therapy	4	$629.63
August 2023: imaging, pain management, physical therapy	5	$1,961.96
September 2023: imaging, pain management, physical therapy	4	$2,526.81

Treatment summary

Patient presented following a side-impact collision at an intersection with reported head trauma and subsequent concussion symptoms. Over the course of fifteen office visits, care consisted of sypmtom monitoring, cognitive and vestibular assessment, graduated activity guidance, and periodic re-examination. The mechanism of injury described is consistent with the reported concussion, and the clinical presentation is plausible for a crash of this type. Several examination findings, including balance and oculomotor measures, support the diagnosis, while other neurological screening tests returned within normal limits. No prior injury to the head or neck region is known to this provider. Treatment followed a typical course, with visit frequency decreasing as symptoms improved and the patient progressed toward return to usual activities. Billed services are consistent with the documented encounters, with no repeated or duplicate charges identified in the record.
