Treatment History and Summary

Patient:	Chase Bowers
Treating provider:	Laura Bennett, DC
Diagnosis:	neck strain

Treatment history by month

Month and services	Visits	Charges
July 2024: chiropractic adjustment, evaluation, imaging, physical therapy	4	$1,186.69
August 2024: chiropractic adjustment, massage therapy, pain management, physical therapy	5	$1,264.81
September 2024: imaging, massage therapy, pain management	5	$2,353.00

Treatment summary

Patient presented following a low-speed head-on motor vehicle collision with acute neck pain, stiffness, and restricted cervical range of motion. The reported mechanism is consistent with the injury observed, and the clinical picture fits the force involved in the event. Over the course of 14 visits, care included manual therapy, therapeutic exercise, and home stretching guidance, progressing in the expected manner. Visit frequency decreased steadily as symptoms improved and function returned. Examination revealed paraspinal muscle tenderness and reduced cervical rotation, supporting the diagnosis of cervical strain. Other neurological and orthopedic screening tests were within normal limits. No prior injury or treatment to the cervical region is known to this provider. Billing records reflect single charges for each service rendered, with no duplicate entries. At discharge, the patient reported near-complete resolution of symptoms and was released to full activity with a home exercise program.
