Officer's narrative

Driver 1 was traveling through the signalized intersection when the vehicle was struck on the driver side by Driver 2, who had entered the intersection from a cross street. The impact was a broadside collision, and both vehicles came to rest near the northwest corner. Driver 1 reported pain in the left shoulder and was transported for evaluation. The injury pattern is consistent with the force and direction of the side impcat observed at the scene. Damage to the struck vehicle is concentrated along the driver door, quarter panel and intrusion into the door frame, which matches the described impact. Driver 2 acknowledged the sequence of events at the scene, and two independent witnesses gave statements that agree with that account. Photographs taken at the scene show debris and damage consistent with the collision. Responding officers confirmed that a Passenger was seated in the vehicle at the time, and no prior damage to the vehicle was noted during inspection. Driver 1 is listed as the named insured on the policy covering the vehicle.
