Patient:	Joshua Aguirre
Treating provider:	Melanie Gomez, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
September 2023: chiropractic adjustment, evaluation, massage therapy	4	$627.43
October 2023: imaging, massage therapy, pain management	5	$2,764.46
November 2023: chiropractic adjustment, massage therapy, physical therapy	4	$468.04

Treatment summary

Patient presented following a low-speed head-on motor vehicle collisoin with complaints of right shoulder pain and restricted range of motion. The mechanism of injury is consistent with the reported impact forces, and the presentation fits the expected pattern for this type of trauma. Imaging and physical examination findings clearly confirm the shoulder injury. No prior injury to the same body region is known from the patient history. Conservative management was provided over thirteen visits, including manual therapy, graded therapeutic exercise, and home exercise instruction. Progress has been somewhat slower than typically seen with this injury, and the course of care has run a bit longer than usual, though the patient has continued to engage well with treatment. Billing records reviewed for this episode show no duplicate or repeated charges for services rendered. Ongoing rehabilitation and periodic reassessment are planned, with return to usual activities anticipated as strength and mobility improve.
