### Officer's narrative

Driver 1 was operating a sedan northbound on a residential roadway in Katy, Texas, when the vehicle collided head-on with a sedan traveling southbound driven by Drievr 2. Officers arrived to find both vehicles stopped in the travel lanes with front-end damage consistent with a low-speed frontal impact. Driver 1 was at the scene and reported neck pain consistent with whiplash, and the reported symptoms appear fitting for the type and force of this collision. Driver 1's presence in the vehicle at the time of the crash was confirmed by officers and by statements from others at the scene. A Passenger was not present. Photographs taken at the scene confirm several details of the collision, including the positions of the vehicles and the damage to their front bumpers, hoods and grilles. No independent witnesses were located who saw the moment of impact. The damage observed on both vehicles matches the account given by the drivers. Nothing in the vehicle's condition or in the available records suggests prior damage to the vehicle. Driver 1 is listed as a named driver on the insurance policy covering the vehicle involved.
