Description of the accident (claimant's words)

I was driving through an intersection in Conroe, Texas, when the car in front of me slowed suddenly and I could not stop in time. The impact was a low-speed head-on collision, but I felt a sharp jolt through my neck and shoulders right away. Once the vehicles were stopped, I was able to step out and speak with the other driver, and we exchanged the details we needed. Later, when I was asked to think back on what happened, I remembered a few small things I had not mentioned at first, but the core of my account has stayed the same from the start. I am the named driver on the policy, and I have been seeking treatment for whiplash since the collision, with stiffness and headaches that have made everyday tasks difficult.
