Patient:	Tracey Guzman
Treating provider:	Jasmine Smith, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
January 2025: evaluation, massage therapy, pain management, physical therapy	5	$1,527.33
February 2025: chiropractic adjustment, imaging, massage therapy, pain management	5	$1,215.36
March 2025: chiropractic adjustment, imaging, massage therapy, pain management	6	$2,893.78
April 2025: imaging, physical therapy	2	$756.70

Treatment summary

Patient presented following a side-impact collision at an intersection with complaints of shoulder pain and restricted motion. The reported injury is consistent with the mechanism and force of the crash. Imaging and physical examination findings clearly confirm injury to the shoulder. Over 18 visits, treatment continued somewhat longer than is typical for this type of injury, with gradual gains in range of motion and strength. Review of the records also shows long-standing treatment for the same shoulder condition before this collision, and much of the current complaint appears to stem from that prior condition rather than the acute event. Billing records show no repeated charges for the same services. Recommendations include continuing the home exercise program, reassessing for residual symptoms, and separating current findings from the pre-existing condition in any future funcitonal evaluation.
