Treatment History and Summary

Patient:	Robin Smith
Treating provider:	Jennifer Lee, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
October 2023: chiropractic adjustment, evaluation, imaging, pain management, physical therapy	6	$1,846.48
November 2023: chiropractic adjustment, massage therapy, physical therapy	6	$941.91
December 2023: chiropractic adjustment, imaging, pain management	3	$1,507.90

Treatment summary

Patient presented following a sideswipe collision that occurred while the driver was changing lanes. Complaints centered on neck and low back pain with associated muscle tightness and reduced range of motion. The mechanism of injury is consistent with the reported crash, and the presentation fits the expected pattern for this type of impact. Imaging and physical examination findings clearly confirm soft tissue injury to the cervical and lumbar regions. No prior injury to these body areas is known from the patient history reviewed at intake. Care included 15 visits consisting of manual therapy, targeted home exercise instruction, and as-needed analgesic management. Treatment followed a typical course, with visit frequency tapering as symptoms improved and function returned. Billing records reflect single charges for each service rendered, with no repeated or duplicate entries. At the most recent evaluation, the patient reported mild residual stiffness and was discharged to self-directed exercise with instructions to return if symptoms recur.
