Treatment History and Summary

Patient:	Ronald Bradford
Treating provider:	Vincent Tran, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
May 2025: evaluation, pain management, physical therapy	3	$1,235.90
June 2025: imaging, massage therapy, physical therapy	6	$3,389.40
July 2025: chiropractic adjustment	1	$83.31

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of right shoulder pain and restricted range of motion. The reported mechanism of injury is consistent in both kind and force with the shoulder findings documented at presentation. Over the course of ten visits, care follwoed a typical progression of conservative management, including physical therapy, home exercise instruction, and anti-inflammatory medication. Visit frequency decreased steadily as symptoms improved and strnegth and motion returned toward baseline. Imaging and physical examination findings clearly confirm the shoulder injury. No prior injury to the same body region is known from the history obtained. Billed services reflect the treatment rendered, with no repeated or duplciate charges identified. Prognosis is favorable with continued home exercise and as-needed follow-up.
