Treatment History and Summary

Patient:	Brad Flores
Treating provider:	Tommy Griffin, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
August 2024: evaluation	1	$359.00
September 2024: chiropractic adjustment, imaging, massage therapy, pain management, physical therapy	8	$2,783.01
October 2024: imaging, massage therapy, pain management	6	$2,704.20
November 2024: imaging, pain management, physical therapy	3	$1,893.59

Treatment summary

Patient presented following a low-speed collision in a parking lot and was evaluated for a wrist fracture consistent with the mechanism of injury and the force described. Over the course of 18 visits, treatment followed a standard, expected progression, including immobilization, imaging follow-up, and graduated range-of-motion and strengthening exercises. Visit frequency decreased steadily as functional gains were made and pain subsided. Examination findings include localized tenderness and reduced grip strength over the affected area, which support the diagnosis. Other neurovascular and sensory tests were within normal limits. No prior injury or treatment involving the same region is documented in available records. Billed services correspond to the care delivered, with no duplicate or repeated charges identified. Patient is progressing well and is expected to reach maximum medical improvement with continued home exercise. Follow-up will be scheduled as needed.
