Treatment History and Summary

Patient:	Stephanie Hernandez
Treating provider:	Kelsey Daniels, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
July 2023: evaluation, physical therapy	3	$728.34
August 2023: chiropractic adjustment, imaging, massage therapy	5	$1,133.93
September 2023: chiropractic adjustment, imaging, massage therapy, pain management	4	$1,248.45
October 2023: imaging, massage therapy	2	$1,220.74

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of low back pain and muscle tightness. The mechanism of injury is consistent with the reported symptoms, and the presentation is entirely plausible for a collision of this type. Examination revealed paraspinal muscle tenderness and restricted lumbar range of motion, and imaging findings clearly confirm the soft tissue injury. The patient has a remote history of a minor strain in the same region, which resolved completely without lasting limitation and does not affect the current assessment. Over the course of fourteen visits, treatment followed a standard conservative protocol including manual therapy, therapeutic exercise, and home stretching instructions. Care tapered grdaually as pain decreased and function improved, and the patient was discharged to self-directed home exercise. Billing for the episode reflects one charge per scheduled service with no repeated or duplicate entries.
