## Treatment History and Summary

| | |
|---|---|
| **Patient:** | Jason Walls |
| **Treating provider:** | Rachel Bell, DC |
| **Diagnosis:** | wrist fracture |

### Treatment history by month

| Month and services | Visits | Charges |
|---|---|---|
| February 2023: chiropractic adjustment, evaluation, imaging, massage therapy | 4 | $1,496.94 |
| March 2023: physical therapy | 1 | $200.45 |

### Treatment summary

Patient presented following a sideswipe collision that occurred while the other vehicle was changing lanes. Examination on initial visit showed localized swelling, tenderness, and reduced grip strength in the affected wrist. Radiographs confirmed a distal radius fracture, and the imaging findings and exam together clearly establish the injury. The patient reports no prior injury to this wrist or surrounding area, and no earlier records of such a problem were available for review. Over five visits, the patient was managed with immobilization, progressive range-of-motion work, and pain control. Recovery has been somewhat slower than typical for this fracture pattern, and follow-up continues to mointor healing and function. Whether this specific injury resulted entirely from the collision remains to be determined, and the mechanism is still under review. Billing records reflect single, appropriate charges for each service without duplication.
