Diagnosis:	concussion

Treatment history by month

Month and services	Visits	Charges
November 2023: chiropractic adjustment, evaluation, imaging, pain management	4	$1,988.99

Treatment summary

Clinical Treatment Summary

The patient presented for evaluation of a concussion sustained when another vehicle sideswiped their car during a lane change. The mechanism of injury is consistent with the reported symptoms, and the head and neck complaints are plausible for a collision of this type. Over four visits, care followed a typical course of concussion management, including symptom monitoring, cognitive and vestibular rest guidance, and graded return-to-activity instructions. Symptoms gradually improved and treatment tapered accordingly. Imaging and examination findings clearly confirm the injury. The patient also reported a minor strain in the same region several years ago, which resolved completely without residual limitation. Billing records showing two similar chrages entered on the same day are currently under review by the administrative team. Clinical follow-up is planned as needed.
