Officer's narrative

Driver 1 was traveling through the intersection in Conroe, Texas, when the collision occurred. Driver 1 reported turning left and was struck by Driver 2, whose vehicle was proceeding straight. The impact landed on the driver's side of Driver 1's vehicle, and the damage visible on both vehicles is consistent with a broadside collision of this type. No prior damage to Driver 1's vehicle was known to me or reported by anyone at the scene. Driver 1 stated that a shoulder injury was sustained in the impact, and the nature of that injury fits the force and direction of the collision as observed. A passenger was also present in Driver 1's vehicle, and both the passenger's presence and Driver 1's presence were confirmed by statements from witnesses at the scene. Driver 2 gave an account of the collision that matches Driver 1's description. Several witnesses and photographs taken at the scene corroborate the sequence of events as reported. Driver 1 is listed as a named insured on the policy covering the vehicle involved.
