Treatment History and Summary

Patient:	Jerome Lang
Treating provider:	Austin Hill, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
July 2024: chiropractic adjustment, evaluation, massage therapy, pain management	4	$942.44
August 2024: chiropractic adjustment, physical therapy	5	$712.22
September 2024: massage therapy	3	$291.99
October 2024: imaging, massage therapy, physical therapy	7	$5,388.30
November 2024: chiropractic adjustment, imaging, pain management	5	$2,519.93
December 2024: imaging, physical therapy	3	$1,446.48

Treatment summary

The patient presented with lower back strain following a collision sustained while turning left, when the vehicle was struck on the driver's side. The mechanism and force of impact are consistent with the injury described. Imaging and physical examination findings clearly confirm soft tissue injury to the lumbar region. The patient has a remote history of a mionr strain in the same area, which resolved completely with no residual limitation. Care over 27 visits followed a typical cuorse of manual therapy, targeted exercise, and anti-inflammatory medication, with visit frequency tapering as function and range of motion improved. At last review the patient reported near-full return to daily activities, and discharge from active care is anticipated. Two similar service charges recorded on the same day are currently under routine review for accuracy.
