Treatment History and Summary

Patient:	Benjamin Vasquez
Treating provider:	Laura Bennett, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
May 2024: chiropractic adjustment, evaluation, massage therapy	4	$638.49
June 2024: chiropractic adjustment, imaging, massage therapy, pain management	4	$1,400.48
July 2024: chiropractic adjustment, imaging, massage therapy, physical therapy	7	$1,577.49
August 2024: chiropractic adjustment, massage therapy	2	$212.36

Treatment summary

Patient presented following a low-speed head-on collision with a wrist fracture. The mechanism of injury is consistent with the reported crash, and the presentation is plausible for this type of impact. Imaging and physical eaxmination findings clearly confirm the fracture. The patient underwent immobilization followed by a structured rehabilitation program across 17 visits. Treatment followed a typical course, with visit frequency tapering as range of motion, grip strength, and pain improved. The patient's history includes a remote minor strain to the same region many years ago, which resolved completely without residual limitation and did not affect the current course of care. Billed services reflect the treatment delivered, with no repeated or duplicate charges identified. Current status is improved function with ongoing home exercises, and no further scheduled visits are anticipated at this time.
