Officer's narrative

Dirver 1 was operating a sedan southbound on the access road in Pasadena, Texas, when the vehicle struck the front of a pickup driven by Driver 2, which was turning across the lane. The impact was low speed, but the front bumper, hood and right headlamp assembly of Driver 1's vehicle showed frseh crush damage consistent with the reported point of contact, and the pickup's rear quarter panel displayed matching paint transfer. Driver 2 stated without hesitation that the collision occurred exactly as Driver 1 described, and two independent witnesses at the scene gave statements that corroborated the sequence. Photographs taken at the secne were reviewed and agree with the damage observed. Driver 1 was seen by responding units inside the vehicle at the time of arrival, and a Passenger seated in the rear was also identified and accounted for. Driver 1 reported pain in the right wrist and was transported for evaluation. No prior damage to the vehicle was noted in department records or by any party at the scene. Driver 1 is listed as the registered operator on the applicable policy.
