Treatment History and Summary

Patient:	Kaylee Johnson
Treating provider:	Barbara Harrell, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
July 2025: chiropractic adjustment, evaluation, imaging, physical therapy	5	$2,373.50
August 2025: chiropractic adjustment, pain management, physical therapy	5	$1,163.86
September 2025: chiropractic adjustment, massage therapy	2	$220.48

Treatment summary

Patient presented following a rear impact sustained while turning left at low speed, reporting neck and back pain with associated stiffness. Over the course of treatment, the patient completed twelve visits consisting of manual therapy, targeted stretching, and home exercise instruction. Cervical and lumbar range of motion was limited, with paraspinal muscle tenderness noted on palpation, while neurological screening, reflexes, and strength were within normal limits. Recovery has been gradual, and the course of care extended somewhat beyond what is typical for a strain of this type. No prior injury to the cervical or lumbar regions is documented in the available history. At this time, it is not yet clear whether the presenting symptoms are fully attributable to this collision, and further correlation with imaging and prior records may be helpful. Billing records reflect single charges for each service rendered, with no duplicate entries.
