Treatment History and Summary

Patient:	Lindsey Martinez
Treating provider:	Jennifer Lee, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
September 2024: evaluation, massage therapy, physical therapy	4	$702.58
October 2024: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$1,554.00
November 2024: pain management	1	$410.81

Treatment summary

Patient presented following a low-speed head-on collision with complaints of neck pain and low back pain with associated muscle stiffness and limited range of motion. The mechanism of injury is consistent with the reported incident, and the presenting complaints are plausible for this type of impact. Examination revealed paraspinal muscle tenderness and reduced cervical and lumbar motion, and imaging findings clearly confirm soft tissue injury consistent with cervical and lumbar strain. No prior injury or treatment to the same body regions is known to this provider. Care consisted of ten visits including manual therapy, therapeutic exercise, and home stretching instruction. The treatment course followed a typical progression, with visit frequency tapering as symptoms improved and range of motion returned toward baseline. Billed services reflect the treatment rendered, with no repeated charges for the same service. Prognosis is good with continued home exercise and as-needed follow-up.
